Fix for this issue is in SVN already... Still working on full support.

Nice, thanks!

Damn weird issue now: Once specified the sidebar content always appears! Some Rails 3 caching stuff, I guess...

#4 - 16 Oct 2012 07:50 - David Rahusen

Hmm, I tried the latest revision 25 from SVN repository...

On executing "rake redmine:plugins:migrate RAILS_ENV=production" as usual, I still get an error. Below is the output of the rake command with option "--trace":

```
** Invoke redmine:plugins:migrate (first_time)
** Invoke environment (first_time)
** Execute environment
rake aborted!

Any hints? Do I do anything wrong?

#5 - 16 Oct 2012 07:54 - David Rahusen

Ok, forget it...once again: stupid error...the directory of the plugin was named "redmine-sidebar". After renaming it to "sidebar", the plugin works so far.
