Target version:			
Redmine version:	2.0.3	**External issue:**	

Description

I have decided to use my webhost for redmine vice my home pc. I have done a fresh install of redmine 2.0.3. Following installation instruction i installed redmine_scm 0.4.1.

Upon creating a new project I am getting a 500 error. Looking at my production log this is what i see:

```
Started GET "/projects/new" for 74.76.105.241 at Sun Jul 01 23:58:29 -0600 2012
Processing by ProjectsController#new as HTML
  Rendered plugins/redmine_scm/app/views/projects/_scm.html.erb (2.2ms)
  Rendered projects/_form.html.erb (329.9ms)
  Rendered projects/new.html.erb within layouts/base (332.2ms)
Completed 500 Internal Server Error in 349ms

ActionView::Template::Error (syntax error on line 33, col 12: `'):
    1: <% if ScmConfig['force_repository'] %>
    2:    <script type="text/javascript">
    3:      //<![CDATA[
    4:      Event.observe(window, 'load', function() {
  lib/redmine/hook.rb:111:in `send'
  lib/redmine/hook.rb:111:in `view_projects_form'
  lib/redmine/hook.rb:61:in `send'
  lib/redmine/hook.rb:61:in `call_hook'
  lib/redmine/hook.rb:61:in `each'
  lib/redmine/hook.rb:61:in `call_hook'
  lib/redmine/hook.rb:58:in `tap'
  lib/redmine/hook.rb:58:in `call_hook'
  lib/redmine/hook.rb:158:in `call_hook'
  app/views/projects/_form.html.erb:23:in `_app_views_projects__form_html_erb__1330010327_69983346
472560'
  app/views/projects/new.html.erb:4:in `_app_views_projects_new_html_erb__1556954071_6998334655048
0'
  app/helpers/application_helper.rb:950:in `labelled_form_for'
  app/views/projects/new.html.erb:3:in `_app_views_projects_new_html_erb__1556954071_6998334655048
0'
```

I know in fact that this version of scm works great on my home pc. The only differences i can think of between the 2 servers is that the problematic one has ruby 1.8.7.

Please Advise.

- Status changed from New to Incomplete

Weird... Line 33 is just </p>. Can't get it.

#2 - 04 Jul 2012 09:49 - Oleksandr Kazymyrov

I have almost the same problem.

When I go to the setting bar of project I have:

```
Started GET "/projects/test/settings" for 192.168.21.1 at Wed Jul 04 11:19:23 +0200 2012
Processing by ProjectsController#settings as HTML
  Parameters: {"id"=>"test"}
  Rendered projects/_form.html.erb (15.5ms)
  Rendered projects/_edit.html.erb (19.5ms)
  Rendered common/_tabs.html.erb (25.1ms)
  Rendered projects/settings.html.erb within layouts/base (26.9ms)
Completed 500 Internal Server Error in 44ms

```

Fresh install of Redmine 2.0.3 and SCM creator r117. Redmine works fine without SCM plugin.

Comments

I have database from 1.4.x. Perhaps the problem with the database migration, because I have had problems with downgrading (deleting the plugin). Perhaps you should delete columns before executing "add_column" in source:db/migrate/001_add_repositories_created_with_scm.rb

#3 - 07 Jul 2012 09:02 - Andriy Lesyuk

[Oleksandr](#), accordingly to this:

```
Searched in:
  * "/opt/redmine/app/views"
):
```

For some reason it does not include plugins' views... Should be same for other plugins... Do you use other plugins? Which one?

#4 - 09 Jul 2012 09:42 - Oleksandr Kazymyrov

I also use [redmine_wiki_gchart_formula](#). It works fine.

If you need extra debug information I can install another plugin. Just give me a link.

#5 - 09 Jul 2012 09:52 - Andriy Lesyuk

Wiki GChart Formula does not contain any templates in app/views... Please test any other plugin which does.

You see - besides /opt/redmine/app/views there should be /opt/redmine/vendor/plugins/redmine_scm/app/views...

#6 - 09 Jul 2012 12:05 - Oleksandr Kazymyrov

- File app_views.txt added

You can see my /opt/redmine/app/views in attachments. I can't find /opt/redmine/vendor/plugins/redmine_scm/app/views!

P.S. [Here](#) is written: Copy your plugin directory into #{RAILS_ROOT}/plugins (Redmine 2.x) or #{RAILS_ROOT}/vendor/plugins (Redmine 1.x). So I have placed plugins in "plugins" directory:

```
hamsin@hserver:~$ sudo ls -l /opt/redmine/plugins
total 12
-r-x------ 1 www-data www-data   31 Jun 18 22:21 README
drwxr-xr-x 5 root     root     4096 Jul  7 17:06 redmine_wiki_gchart_formula
dr-xr-xr-x 7 www-data www-data 4096 Jun 30 13:05 scm_creator
```

Sorry, it should be in /opt/redmine/plugins/redmine_scm/app/views for Redmine 2.0.x.

#8 - 09 Jul 2012 12:20 - Oleksandr Kazymyrov

I just tried redmine banner plugin. It works fine.

#9 - 09 Jul 2012 12:26 - Oleksandr Kazymyrov

I have found how to fix my problem. I made:

1. rake redmine:plugins:migrate RAILS_ENV=production NAME=redmine_scm VERSION=0
2. Rename folder scm_creator to redmine_scm
3. rake redmine:plugins:migrate RAILS_ENV=production

After these tricks it works fine.
