

Project Alias - Bug #2104

Route error while rendering admin menu at version 1.4.4

02 Oct 2012 11:49 - David Rahusen

Status:	Closed	Start date:	02 Oct 2012
Priority:	Normal	Due date:	14 Jul 2013

Category:		Estimated time:	0.00 hour
Target version:	0.1.0	External issue:	
Redmine version:	1.4.x		

Description

ActionView::TemplateError (No route matches {:controller=>"project_aliases", :action=>"index"}) on line #3 of app/views/admin/_menu.html.erb:

Associated revisions

Revision 15 - 14 Jul 2013 23:41 - Andriy Lesyuk

Redmine 1.4.x support and Turkish translation (#2068 and #2104)

History

#1 - 02 Oct 2012 11:52 - David Rahusen

Fixed!

Added file "routes.rb" into the config directory of the plugin. The file needs to have the following content:

```
ActionController::Routing::Routes.draw do |map|
  map.connect 'admin/plugins/project_alias/:action', :controller => 'project_aliases', :conditions => {:method => [:post, :get]}
end
```

Not yet fully tested, but I guess this plugin is now fully functional for redmine version 1.4.4.

#2 - 06 Nov 2012 17:41 - Thomas Jahns

Even after adding the code listed in above update, I still get the following (with date/ip obfuscated):

```
Processing AdminController#index (for 377.456.189.1 at 2023-13-43 42:42:42) [GET]
Parameters: {"action"=>"index", "controller"=>"admin"}
Rendering template within layouts/admin
Rendering admin/index
```

```
ActionView::TemplateError (No route matches {:action=>"index", :controller=>"project_aliases"}) on line #3 of app/views/admin/_menu.html.erb:
1: <div id="admin-menu">
2:   <ul>
3:     <%= render_menu :admin_menu %>
```

```
4: </ul>
5: </div>
```

Rendering /home/redmine/redmine-1.4.4/public/500.html (500 Internal Server Error)

My redmine instance is installed in a sub-directory and this happens when trying to access the admin section. /home/redmine/redmine is a link to /home/redmine/redmine-1.4.4.

I'm very impressed the redmine makers introduced the route.rb change seemingly without any care whether the majority of plugins would be ready for the switch.

#3 - 26 Nov 2012 21:52 - Andriy Lesyuk

- Status changed from New to Open
- Assignee set to Andriy Lesyuk
- Target version set to 0.1.0

#4 - 10 Dec 2012 20:12 - Spenser Gilliland

I'm running into a similar error although not exactly the same.

After installing the plugin. Access to <redmine_uri>/admin would fail with the same error as above.

After adding the routes.rb code above. Access to <redmine_uri>/admin works but creating a new alias causes the following error. Url is <redmine_uri>/admin/plugins/project_alias/new

Any suggestions for a fix?

```
Processing ProjectAliasesController#new (for 192.168.200.1 at 2012-12-10 19:21:23) [GET]
Parameters: {"action"=>"new", "controller"=>"project_aliases"}
Rendering template within layouts/admin
Rendering project_aliases/new
```

```
ActionView::TemplateError (undefined method `errors' for :alias:Symbol) on line #3 of vendor/plugins/project_ali
as/app/views/project_aliases/new.rhtml:
1: <h2><%= link_to(1(:label_project_alias_plural), { :controller => 'project_aliases', :action => 'index' }) %
```

```

> &#187; <%= l(:label_project_alias_new) %></h2
>
2:
3: <%= error_messages_for :alias %>
4:
5: <% form_for(@alias, :url => { :action => 'create' }, :builder => TabularFormBuilder) do |f| %>
6:   <div class="box tabular">

```

- File *project_alias_compat_1.4.5.patch* added

Worked on this a bit tonight. The following patch gets it to stop 500'ing.

This is all updates to the new.rhtml and adding routes.rb.

The first error which is mentioned above was fixed by adding routes.rb with the content specified.

The second error was that `error_messages_for` has been phased out and replaced with the following according to.

<https://github.com/ivyl/redmine-gitolite/commit/af9fc062034cadc6d5e4a89e901c40df17bc06cd>

Thirdly, the `TabularFormBuilder` has moved to `Redmine::Views::LabelledFormBuilder` according to.

<http://www.redmine.org/boards/4/topics/32302>

The diff is attached.

The following error is occurring and may or may not need to be fixed but as I have little rails experience I'm not really sure how to do that.

```

ActionController::RoutingError (No route matches "/plugin_assets/project_alias/stylesheets/admin.css" with {:method=>:get}):
