<b>Description</b> hi,  from my current view, redmine_scm can only create repo on local machine. i'm thinking it would be better if it can integrate existing local/remote scm system, (e.g. gitolite, github, collabnet, etc.) so that wen we click the 'create repo' button, it would create the repo on the exiting scm system  do you have any plan to support this? thanks:)			

History

- #1 - 15 Nov 2012 00:12 - Andriy Lesyuk
- Subject changed from integrate with existing scm system to Integrate with existing scm system
  - Status changed from New to Open
  - Assignee set to Andriy Lesyuk

No plans so far... But a very interesting idea! Thanks for sharing.

P.S. Regarding Gitolite - seems there is a plugin for it?..
