<div>Description</div> <div> #1773 allows to enable sidebar for project pages only... Now I think it would be cool to have the same for global pages. Anyway currently, without #1771, it's useless to have sidebar enabled on global pages as there are no ways to put something there (<i>using this plugin</i>). </div> <div>Sample usage:</div> <div>Perhaps, I would like to enable the sidebar for registration page and explain there why users should register...</div>
