#### Description

Not sure how difficult to create an OpenID provider... But what if spammers do this? Then they will be able to login with just any username and password...

#### History

##### #1 - 07 Feb 2013 13:03 - Andriy Lesyuk

- Priority changed from Critical to Major

I need to think more about this feature. Currently the idea is to:

- Add new item to admin menu below "LDAP authentication" called "OpenID Provider", which will be activated when user selects "Restrict OpenID providers"
- Add new database with fields:
  1. Name
  2. URL
  3. Enabled or disabled
- All not registered in the database providers should be disabled, of course.
- The feature should integrate [Redmine OpenID Selector plugin](#) of [Jorge Barata Gonzalez](#).

##### #2 - 14 Apr 2014 21:06 - Andriy Lesyuk

- Due date set to 14 Apr 2014

- Status changed from Open to Closed

- Target version set to 0.2.0

- % Done changed from 0 to 100
