

Extended Fields - Bug #2116

Error updating custom field that has template

15 Oct 2012 14:03 - apan loco

Status:	Closed	Start date:	15 Oct 2012
Priority:	Normal	Due date:	08 Dec 2012
Assignee:	Andriy Lesyuk	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	0.2.1	External issue:	
Redmine version:	2.1.2		

Description

I have added an Integer Custom Field for Issues with a simple Custom Field Template:

```
[da@home extended_fields$]$ cat app/views/custom_values/int/_testinteger.html.erb
Test: <%= custom_field.value.to_s %>
```

It works great to show it:

```
TestInteger:    Test: 2
```

But when I try to change it, I'm greeted with:

```
404
The page you were trying to access doesn't exist or has been removed.
```

And this is generated in the logs:

```
Started PUT "/redmine/issues/1" for :::1 at Mon Oct 15 15:56:23 +0200 2012

  Current user: user (id=1)
  Rendered mailer/_issue.text.erb (7.4ms)
  Rendered mailer/issue_edit.text.erb within layouts/mailer (11.3ms)
Missing template, responding with 404
  Rendered common/error.html.erb within layouts/base (0.1ms)
Completed 404 Not Found in 291ms (Views: 16.6ms | ActiveRecord: 19.3ms)
```

If I remove the custom field template (_testinteger.html.erb) everything works again.

I am using these versions:

Environment:

Redmine version	2.1.2.stable
Ruby version	1.8.7 (i686-darwin9.2.1)
Rails version	3.2.8
Environment	production
Database adapter	MySQL
Redmine plugins:	
extended_fields	0.2.0b

So what am I doing wrong? Why can't I change the values for the custom fields when I have added custom field templates?

/apan

Please try adding also app/views/custom_values/int/_testinteger.text.erb with the same content and tell me if it works.

#2 - 15 Oct 2012 15:04 - apan loco

This indeed fixes the issue.

I have the same problem if I update a Custom Field that is of one of the new types, more specifically "Project". So just to test I also tried putting a _project.text.erb besides _project.html.erb and that also worked.

#3 - 15 Oct 2012 15:10 - Andriy Lesyuk

Yeah... You just confirmed my assumption: When you update Redmine sends email in text or html+text format. And there is no *.text.erb template for "templated" custom fields... So the workaround is to add such templates.

P.S. Will need some time to fix this issue (*have also work on other projects*). Please use the workaround currently.

#4 - 15 Oct 2012 15:11 - apan loco

Thanks for looking into it and finding a workaround so quickly. Appreciate it!

#5 - 13 Nov 2012 00:32 - Andriy Lesyuk

- Status changed from Open to In Progress
- Target version set to 0.2.1

#6 - 13 Nov 2012 23:53 - Andriy Lesyuk

- % Done changed from 0 to 100

Fix is in SVN... Try updating.
