Description

On a fresh install of Redmine 2.1.4, I have the following error when doing 'rake redmine:plugins:migrate' :

- Invoke redmine:plugins:migrate (first_time)
- Invoke environment (first_time)
- Execute environment
rake aborted!

Please try adding:
require_dependency 'extended_fields_helper'
below:
require_dependency 'extended_fields_hook'
in init.rb

#3 - 07 Dec 2012 01:55 - Andriy Lesyuk

Maybe also try moving extended_fields_helper.rb from app/helpers into lib...

That's not usual issue – I doubt other users experience it. I think it's due to environment (e.g., mingw32).

I added require_dependency 'extended_fields_helper' in init.rb and moved extended_fields_helper.rb from app/helpers into lib. And ... it seems to work except that I now have the following error :

```
Started GET "/plugin_assets/extended_fields/stylesheets/extended_fields.css" for 127.0.0.1 at 2012-12-07 14:04:10 +0100

And take into account that I'm still facing the bug [#2123](#), so my tests are quite limited.

As I have already mentioned I believe it's something specific for your environment (maybe [#2123](#) as well)... CSS files normally should not give routing errors.

See: <http://stackoverflow.com/questions/7829480/no-route-matches-get-assets> (please try this solution)

Thanks, I'll look your url.
As for [#2123](#), I reproduced it on a Debian running Apache.

#8 - 07 Dec 2012 17:02 - Bruno Spyckerelle

You were right, it is linked my environment, I solved this issue.
Thanks !
