

Extended Fields - Bug #2133

Rendering HTML for email

11 Dec 2012 12:44 - Andriy Lesyuk

Status:	Closed	Start date:	11 Dec 2012
Priority:	Normal	Due date:	27 Jan 2013

Target version:	0.2.1	External issue:	
Redmine version:			
Description			
Right now custom fields are always generated as plain text for ActionMailer templates, i.e., email...			
To determine the target format for ActionView, i.e., web views, I use request.template_format. But no request is available for Mailer templates! Therefore, rendering falls back to the default format, which is plain text.			
I really need an idea, how can I determine the target format (e.g., content type) from within a Mailer's view. I tried to search for a hint but failed...
