

WikiNG - Bug #2134

file# or file:<name> doesn't work

12 Dec 2012 09:20 - Miodrag Milic

Status:	Won't Fix	Start date:	12 Dec 2012
Priority:	Normal	Due date:	
Assignee:	Andriy Lesyuk	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		External issue:	
Redmine version:	2.1.3		

Description

Either I am doing something wrong, or this is indeed a bug.

On the screenshot you can see file & [Andriy Lesyuk](#) bellow it.

History

#1 - 12 Dec 2012 10:25 - Andriy Lesyuk

- Status changed from New to Incomplete

- Assignee set to Andriy Lesyuk

This is weird, as file#389 here gives: [wiking-0.0.3.tar.bz2...](#)

What is this Wiki content for? For a Wiki page? Same project, where files are?

#2 - 12 Dec 2012 14:01 - Miodrag Milic

File is added normaly via Files module as shown on screenshot.
Its regular wiki page.

I just tested on my another system (desktop Ubuntu 12.04 x32b x ruby 1.8 versus server Ubuntu 12.04LTS x 64b x ruby 1.9.1) and the result is the same.

If I can help you in any other way let me know.

#3 - 17 Dec 2012 12:31 - Miodrag Milic

Close this issue.

I just noticed CSS elements do not work to realize I have 0.0.2.

#4 - 17 Dec 2012 12:40 - Andriy Lesyuk

- *Status changed from Incomplete to Won't Fix*

Ok, thanks for clearing it up.
