Are you using the latest version of the plugin? You specified 2.3 as "System version" – do you mean Redmine 2.3.x?

Yes, I'm meaning Redmine 2.3.x (cloned by git) and the last version of the plugin (cloned by svn).

I'm n00b in ruby but with a lot of knowledge of php, I am not sure that this is the best fix but I've changed the line with .order('name')

```
<% projects = Project.all_public.active.order('name').collect{ |project| [ project.name, project.id ] } %>
```

If there's a better fix, you will know how it will be
