

Extended Fields - Feature #2156

Per user values?

Description

What about adding another checkbox to custom field properties:

Per user

☐

If set, values for such custom field should be stored in separate table, e.g., custom_user_values. This table should contain an additional field: user_id.

In other words, this checkbox will make it possible for each user to set his/her own value for the custom field. This can be used for:

- Polls
- Votes

The problem is how to show such values (all? some aggregate result? should depend on type?).
