Target version:				
External issue:				

Description

I use to hide sensitive data.
Why not adding full featured macro that does this and displays *** if you don't have adquate rights, just like

This is the /.

History

#1 - 09 Apr 2013 10:47 - Andriy Lesyuk

- Status changed from New to Incomplete

- Assignee set to Andriy Lesyuk

Why renaming then? I guess it's about new macro, e.g., {{hidden}}.

However, I did not get how the plugin should check rights? I.e., in what condition it should show the text and in what ***? Special permission?

Because it does what hidden should do, including the admin section where you have right "view hidden text".

Yes, the one I mentioned above,or entirely new one since that is not enough - the one needs to disable hidden text showing in wiki history and in various exports.
