Description Just came across these interesting blog-related protocols and thought, that they could be useful for Redmine. For example: <ul style="list-style-type: none">• Issue:<ul style="list-style-type: none">◦ If some external issue links to an issue, this external issue can be added to related external issues.◦ If an external issue links to the project, this issue can be imported into the issue list of the project.• News:<ul style="list-style-type: none">◦ If a news links to some article, that article can be notified about the link.◦ If an article links to some news, Redmine can be notified about the link too.• Activity:<ul style="list-style-type: none">◦ Anything that links to a project page can be added to the project's activities.
