Description			
Hi,			
Thanks for your great work!			
I have tried Role Shift plugin, but I faced one problem as below:			
- My system roles and permission settings: Developer can view issue list normally and Non-member is NOT allowed to view issue list.			
- Project A - Role Shift settings: Shift Non-member role to Developer role.			
Problem:			
- Non-member can NOT see any issue on issue list of project A, issues are not visible.			
- Non-member can only access issue of project A by entering the link.			
Do you have any hint for me? Thank you in advanced!			
Regards,			

History

#1 - 09 Aug 2013 21:17 - Andriy Lesyuk

- Tracker changed from Bug to Support
- Status changed from New to Incomplete
- Assignee set to Andriy Lesyuk

Viewing an issue and viewing the issue list is controlled by the same permission, so it sounds odd. What version of Redmine are you using?
