Redmine version:	
Description First let me say thank you for this theme. It is a nice change from most of the other Redmine themes. I have an issue that appears in the admin menu. It looks like the highlighting on the currently selected admin link looks like it comes from the default Redmine theme. The other odd thing is it does not put the same highlighting around new admin links that are plugins. I have attached a screen shot. Thanks again for the nice theme, Tide
