Extended Fields - Bug #2197

"Wiki text" custom fields are not textilized in the issues list

24 Jul 2013 17:41 - Jeremy Bailey

Status:	Closed		**Start date:**	24 Jul 2013
Priority:	Normal		**Due date:**	06 Sep 2013

Target version:	0.2.2			
Redmine version:	2.3.1		**External issue:**	

Description

It seems that "Wiki text"-type custom fields are only textilized in the issue page, not in the issues list. Within the issues list, "Wiki text" fields currently show up as plain text. It seems to me that the expected default behavior would be to format the text in the same way for all Redmine screens where that field is visible.

If a generic fix would be difficult to implement, and my desired result can be achieved through customization of a template, can you please suggest some detailed instructions? I had a look at your documentation, but I am only a front-end admin for my Redmine site, and can't easily test templates without setting up my own development site.

Thank you in advance. I'm pretty sure I'm going to buy your book by the way.

Thanks for wonderful plugin)
But we have the same issue.
Our Redmine is 2.3.1 and we are using SVN version of your plugin

Applied in changeset r93.

#5 - 06 Sep 2013 21:13 - Andriy Lesyuk

- Due date set to 06 Sep 2013

#6 - 06 Sep 2013 22:23 - Andriy Lesyuk

- Tracker changed from Support to Bug

#7 - 19 Sep 2013 00:30 - Jeremy Bailey

Thanks for the fix! We'll check it out. I don't suppose you would consider updating the version number of the plug-in so we know whether we're up to date...
