<b>Target version:</b>		<b>External issue:</b>	
<b>Redmine version:</b>	2.3.2		

#### Description

Hi,

When I create a new project, it gets a 404 error.

"The page you were trying to access doesn't exist or has been removed."

My system information :

Environment:

Redmine version 2.3.2.stable  
Ruby version 1.9.3-p448 (2013-06-27) [x86\_64-linux]  
Rails version 3.2.13  
Environment production  
Database adapter MySQL2  
Redmine plugins:  
redmine\_scm 0.4.3

Please fix it, thanks!

#### History

##### #1 - 29 Jul 2013 12:39 - Andriy Lesyuk

- Status changed from New to Incomplete
- Target version deleted (0.4.3)

The issue does not look to be related to the SCM Creator... Could you please:

1. Check logs for any errors happening, when you are trying to create new project and...
2. Moving the plugin's folder (redmine\_scm) to another location and restarting Redmine to see if the issue is caused by the plugin at all?

##### #2 - 29 Jul 2013 15:31 - Minh Thien

OK,

Thanks for your plugins!

When I install the SCM Creator plugin on the real server CentOS, it's successful.  
If I use a VMWare machine for CentOS 6.4, it's an error, this problem is solved.

Thank you.

**#3 - 08 Sep 2013 14:54 - Andriy Lesyuk**

- *Due date set to 08 Sep 2013*

- *Status changed from Incomplete to Won't Fix*

Ok, thanks!
