Description			
Hi, A standard directory svn include : - trunk - branches - tags Please add a option enable create struct directory for svn Thanks.			

History

#1 - 08 Sep 2013 14:52 - Andriy Lesyuk

- Status changed from New to Incomplete
- Target version deleted (0.4.3)

Minh Thien, do you know which svn option should be used to create such directory structure?

#2 - 19 Sep 2013 12:32 - Terence Miller

We just execute a script to create repos from template

\$SVN_REP/ is our base folder for all scn repos
\$SVN_REP/.repoTemplate/ is our svn template folder
\$SVN_REP/.repoTemplate/hooks is our hooks template folder
\$SVN_REP/.repoTemplate/initial is our template scn folder structure

```
#!/bin/sh
if [ "$1" == "" ]
then
    echo "missing project name"
else
    SVN_REP=/srv/svn
    svnadmin create "$1"
    rm -r "$1/hooks"
    ln -s "$SVN_REP/.repoTemplate/hooks" "$1/hooks"
    chown wwwrun.www "$1" -R
    chmod 775 "$1" -R
    svn import "$SVN_REP/.repoTemplate/initial" file://$1 --message "Initial directories"
fi
```

This script is triggered by reposman.rb which should be too by this plugin, but on a remote svn server
