Description

Hi, I'm using scm-creator with redmine 2.2.3.stable.
And I've updated the plugin to recent Revision r127, then, svn repository page broke.
Please look at the attached screenshot for what's happen.

Maybe, it's caused by html_safe rule changes of string.gsub in rails 3.x (see
https://github.com/rails/rails/commit/53a2c0baf2b128dd4808eca313256f6f4bb8c4cd)

I attached a simple patch to fix this, checked with redmine 2.2.3.
I hope this will be helpful.
