#### Description

When using Internet Explorer (had to for testing) I noticed this issue.

I use Redmine. I changed contact\_form/assets/javascripts/contact\_jquery.js from:

```
$('#form .box.tabular').last().prepend(contact_form);
```

to:

```
$('#form .box.tabular').last().append(contact_form);
```

and the issue is gone. This puts the item last in the list and fixes the issue for now.

In trying to fix another issue with contact form ([#2208](#)), I think this issue can be fixed as well. I requested two new view hooks for Redmine [#14614](#). Using these hooks should fix this problem as well.
