<b>Target version:</b>		<b>External issue:</b>	
<b>Redmine version:</b>			
<b>Description</b>			
<p>The ISSUE-id plugin adds the issue_id function, which is used to generate the featured id. Also the to_param function is used by Redmine to put the correct ID into links etc. The plugin also patches a <u>lot</u> of other native Redmine functions to replace native Redmine issue id with the featured one.</p> <p>This could be <u>much easier</u>, if Redmine came with a special function for displaying issue ids, which could be named, e.g., display_id! So when the plugin is released I need to make such suggestion to Redmine guys...</p>
