RedPress - Feature #2246

Wiki syntax for blog posts

Description

In Redmine's Wiki content we can reference to issues, Wiki pages, news, forum topics, and so on. But we can't reference to blog posts! Yet...

I believe the syntax for the blog post reference should look like:

<<blook_post-slug|dispay text>>

and:

<<#X|display text>>

Certainly, this should work only if the base_url was specified in redpress.yml...

Additionally, perhaps, a new option, e.g., permalink_format, should be supported.
