

RedPress - Improvement #2247

Redirect back after logout

<b>Description</b> If one accesses a page, that requires authentication, he/she gets the Redmine login form instead. When he/she authenticates, Redmine redirects him/her back... The RedPress includes the code, that makes this possible, as the pure Redmine rejects redirection to a non-Redmine URL.  The pure Redmine behaves in the similar way for logouts: when one clicks "Logout" on some page, he/she gets redirected back to this page after successful logout. But this won't work for WordPress pages! As the pure Redmine needs to be monkey-patched to allow this as well.
