**Description**

Working with SVN trunk version.

Deleting a project section triggered an exception.  
This turned out to be due to the fact that the `before_filter :find_parent_section` in `project_sections_controller.rb` was not defined for the 'destroy' action.  
I changed the definition as follows:

```
before_filter :find_parent_section, :only => [ :edit, :update, :destroy ]
```

and now it works.
