Description

Hello, thanks for your plugin.

User gets a message from redmine, but it's not available to see who sent it.
It's only presented in Reply-to, but not in a body. It's a bit disapointed
for simple users.

- Status changed from Open to Incomplete

- Target version deleted (0.1.1)

The sender should also be in From – i.e., it should be well seen, who is the sender. Does the From header contain a different value in your case?

In "From" I get Notifier <notifier@redmine-project.domain>
In "Reply-to" I get User <users@email.address>
