#### Description

Hi, I have installed last version of this plugin (r68)in a 2.4.0 redmine. The wiki syntax help stop working. Googling I found this:

<http://stackoverflow.com/questions/17235955/redmine-wiki-help-button-is-not-working>

Then deactivated and reactivated the wiking plugin and found it was the responsible of breaking the help.

I have seen that was a previous closed issue ([#2158](#)), so I copied it (instead of reopening it). The effect is the same, but I don't know if there is a regression or there is a new problem.
