<b>Description</b>			
Taking my site:			
If an article has all three translations and user languages include all three languages, an index page shows all three posts! To some extent it's fine, but...			
I prefer having such posts grouped under the primary one, as shown on the mock-up:			
<div> <b>The nature of Euromaidan</b>  </div> <div>Added by <i>Andriy Lesyuk</i> 4 weeks ago</div>			
Here flags will be clickable and will point to corresponding translations.			
The problem is that I don't know, how to implement this (even not sure, if it's possible)...
