Description

Environment:
Redmine version 2.5.0.devel.12986
Ruby version 1.8.7-p352 (2011-06-30) [x86_64-linux]
Rails version 3.2.17
Environment production
Database adapter Mysql2
Redmine plugins:
redpress 0.0.1b

To get it installed I had to do the following:

Received error: undefined method `named_scope' in red_news_patch.rb:7:in `included'
I changed `base.named_scope(:visible)` to `base.scope(:visible)`.

I then tried to migrate plugins again and:
Received error: uninitialized constant ActionController::Routing::Routes in routes.rb

I changed:

```
ActionController::Routing::Routes.draw do |map|
  map.connect('session.:format', :controller => 'red_press', :action => 'index', :conditions
=> { :method => :get })
  map.connect('projects/:id/menu.:format', :controller => 'red_press', :action => 'project_menu'
, :conditions => { :method => :get })
  map.connect('news/:id/migrate', :controller => 'red_press', :action => 'migrate_news',
:conditions => { :method => :get })
end
```

to:

```
RedmineApp::Application.routes.draw do
  match 'session.:format', :controller => 'red_press', :action => 'index', :via => :get
  match 'projects/:id/menu.:format', :controller => 'red_press', :action => 'project_menu', :via
=> :get
  match 'news/:id/migrate', :controller => 'red_press', :action => 'migrate_news', :via => :get
end
```

I was then able to migrate the plugin.

My question is did any of that break the plugin? I am having issues getting Wordmine working.

I will update this with a link to my Wordmine post.
