

WordMine - Support #2285

Can't get this to work

21 Mar 2014 05:21 - Johnny Tide

Status:	In Progress	Start date:	21 Mar 2014
Priority:	Normal	Due date:	
Assignee:	Andriy Lesyuk	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
I am trying to get this installed but I am having a lot of trouble.			
Environment:			
Redmine version 2.5.0.devel.12986			
Ruby version 1.8.7-p352 (2011-06-30) [x86_64-linux]			
Rails version 3.2.17			
Environment production			
Database adapter Mysql2			
Redmine plugins:			
redpress 0.0.1b			
I had to modify the RedPress plugin to get it to install.			
I installed the Wordmine plugin but after setting it up it logs me out and I can never log back in.			
I have set up two admins in Redmine before installing Wordmine.			
When trying to log in with one I get :			
ERROR: The password you entered for the username Tide is incorrect.			
The other user I get nothing it just clears the login boxes after pressing Log In.			
Is there any information I can give you that will help diagnose the issue?

- Status changed from New to In Progress

- Assignee set to Andriy Lesyuk

You needed to follow the steps described [here](#). It's normal behaviour, as WordMine changes the authentication style.

I'm also thinking about an approach, which would allow an admin user to always login using WordPress' credentials... Not ready for now.
