

RedWord - Bug #2296

Automated theme scanning failed

24 May 2014 19:54 - Andriy Lesyuk

Status:	Closed	Start date:	24 May 2014
Priority:	Normal	Due date:	27 May 2014
Assignee:	Andriy Lesyuk	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.0b		
Description			
This should be fixed before upload:			
<ul style="list-style-type: none">REQUIRED: <code>.gallery-caption</code> css class is needed in your theme css.REQUIRED: <code>.bypostauthor</code> css class is needed in your theme css.RECOMMENDED: Text domain problems in <code>taxonomy.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>tag.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>post_tags.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>page.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>landing-page.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>functions.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>content.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>comment.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>child_pages.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>category.php</code>. You have not included a text domain!RECOMMENDED: Text domain problems in <code>author.php</code>. You have not included a text domain!WARNING: The flexible-width and fixed-width tags changed to fluid-layout and fixed-layout tags in WordPress 3.8. Additionally, the responsive-layout tag was added. Please change to using one of the new tags.REQUIRED: No content width has been defined. Example:<div><pre>if (! isset(\$content_width)) \$content_width = 900;</pre></div>REQUIRED: Could not find <code>wp_link_pages</code>. See: wp_link_pages<div><pre><?php wp_link_pages(\$args); ?></pre></div>RECOMMENDED: could not find the file <code>readme.txt</code> in the theme. Please see Theme_Documentation for more information.RECOMMENDED: Possible variable <code>\$this</code> found in translation function in <code>post_tags.php</code>. Translation function calls must NOT contain PHP variables.RECOMMENDED: Possible variable <code>\$this</code> found in translation function in <code>child_pages.php</code>. Translation function calls must NOT contain PHP variables.RECOMMENDED: Possible variable <code>\$instance</code> found in translation function in <code>post_tags.php</code>. Translation function calls must NOT contain PHP variables.RECOMMENDED: Possible variable <code>\$instance</code> found in translation function in <code>child_pages.php</code>. Translation function calls must NOT contain PHP variables.RECOMMENDED: No reference to <code>add_theme_support("custom-header", \$args)</code> was found in the theme. It is recommended that the theme implement this functionality if using an image for the header.RECOMMENDED: No reference to <code>add_theme_support("custom-background", \$args)</code> was found in the theme. If the theme uses background images or solid colors for the background, then it is recommended that the theme implement this functionality.RECOMMENDED: No reference to <code>add_editor_style()</code> was found in the theme. It is recommended that the theme implement editor styling, so as to make the editor content match the resulting post output in the theme, for a better user experience.
