

RedWord - Bug #2296

Automated theme scanning failed

24 May 2014 19:54 - Andriy Lesyuk

Status:	Closed	Start date:	24 May 2014
Priority:	Normal	Due date:	27 May 2014
Assignee:	Andriy Lesyuk	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.0b		

Description

This should be fixed before upload:

- **REQUIRED:** `.gallery-caption` css class is needed in your theme css.
- **REQUIRED:** `.bypostauthor` css class is needed in your theme css.
- **RECOMMENDED:** Text domain problems in `taxonomy.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `tag.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `post_tags.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `page.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `landing-page.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `functions.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `content.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `comment.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `child_pages.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `category.php`. You have not included a text domain!
- **RECOMMENDED:** Text domain problems in `author.php`. You have not included a text domain!
- **WARNING:** The flexible-width and fixed-width tags changed to fluid-layout and fixed-layout tags in WordPress 3.8. Additionally, the responsive-layout tag was added. Please change to using one of the new tags.
- **REQUIRED:** No content width has been defined. Example:

```
if ( ! isset( $content_width ) ) $content_width = 900;
```

- **REQUIRED:** Could not find `wp_link_pages`. See: [wp_link_pages](#)

```
<?php wp_link_pages( $args ); ?>
```

- **RECOMMENDED:** could not find the file `readme.txt` in the theme. Please see [Theme_Documentation](#) for more information.
- **RECOMMENDED:** Possible variable `$this` found in translation function in `post_tags.php`. Translation function calls must NOT contain PHP variables.
- **RECOMMENDED:** Possible variable `$this` found in translation function in `child_pages.php`. Translation function calls must NOT contain PHP variables.
- **RECOMMENDED:** Possible variable `$instance` found in translation function in `post_tags.php`. Translation function calls must NOT contain PHP variables.
- **RECOMMENDED:** Possible variable `$instance` found in translation function in `child_pages.php`. Translation function calls must NOT contain PHP variables.
- **RECOMMENDED:** No reference to `add_theme_support("custom-header", $args)` was found in the theme. It is recommended that the theme implement this functionality if using an image for the header.
- **RECOMMENDED:** No reference to `add_theme_support("custom-background", $args)` was found in the theme. If the theme uses background images or solid colors for the background, then it is recommended that the theme implement this functionality.
- **RECOMMENDED:** No reference to `add_editor_style()` was found in the theme. It is recommended that the theme implement editor styling, so as to make the editor content match the resulting post output in the theme, for a better user experience.
