Currently, I'm getting the following error for Facebook:

```
Started GET "/auth/facebook/callback?code=...&state=..." for **.***.***.*** at 2016-10-23 10:52:11 +0000
Started GET "/auth/failure?message=invalid_credentials&origin=http%3A%2F%2Fprojects.andriylesyuk.com%2Flogin&strategy=facebook" for **.***.***.*** at 2016-10-23 10:52:12 +0000
```

```
ActionController::RoutingError (No route matches [GET] "/auth/failure"):
```

```
...
```

#2 - 23 Oct 2016 11:36 - Andriy Lesyuk

Added the following code to init.rb:

```
OmniAuth.config.on_failure do |env|
  [200, {}, [env['omniauth.error'].inspect]]
end
```

Now getting:

```
#<OAuth2::Error: :
{"error":{"message":"Error validating verification code. Please make sure your redirect_uri is identical to the one you used in the OAuth dialog request","type":"OAuthException","code":100,"fbtrace_id":"..."}>
```
