

Extended Fields - Bug #2320

Internal error when opening issues tab

26 Jun 2014 04:30 - Naoki Tamura

Status:	Under Verification	Start date:	26 Jun 2014
Priority:	Normal	Due date:	
Assignee:	Andriy Lesyuk	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	0.2.4	External issue:	
Redmine version:			

Description

- In the following cases, Internal error occurred in issues tab.
 - enviroment:Extended Fields plugin v0.2.1, ruby v1.9.3 , Redmine v2.2.2
 - Add a custom Field whose format is **Project** .
 - Add a custom Field whose format is Text.
 - Click Redmine Issues tab → Internal error

get error log:

```
ActionView::Template::Error (comparison of Array with Array failed):
```

```
20: </td>
21: <td class="add-filter">
22: <%= label_tag('add_filter_select', l(:label_filter_add)) %>
23: <%= select_tag 'add_filter_select', filters_options_for_select(query), :name => nil %>
24: </td>
25: </tr>
26: </table>

```

I think that a cause is "lib/extended_custom_query_patch.rb" line 35.

source:lib/extended_custom_query_patch.rb#L35

```
@available_filters[filter_id] = options.merge({ :name => filter_name, :format
=> field.field_format }) if options
```

Above, a variable field is not added to options.

In Redmine model/query.add_custom_field_filter(field, assoc=nil) method, a variable field is added to options.

```
add_available_filter filter_id, options.merge({
  :name => filter_name,
  :format => field.field_format,
```

```
    :field => field  
  })
```

What do you think of it?
