Target version:			
Redmine version:		**External issue:**	

Description

Hi I install your plugin and i had a token in /var/www/redmine/config/scm.yml and when i try to add a new project i cannot create a github repo i do not have the create button.

And when i try also with login/passwd

It look like that it does not lot the API because and github → my account → API key never used

And thanks great project

octokit (3.3.1)
