

Extended Fields - Bug #2359

Extended fields plugin breaks PDF export

29 Jan 2015 07:50 - Sergey B

Status:	In Progress	Start date:	29 Jan 2015
Priority:	Normal	Due date:	
Assignee:	Andriy Lesyuk	% Done:	90%
Category:		Estimated time:	0.00 hour
Target version:	0.2.4	External issue:	
Redmine version:			

Description

PDF export of issue list doesn't work after installation of extended fields plugin.

Environment info

Environment:

```
Redmine version      2.5.1.stable
Ruby version         1.9.3-p231 (2012-05-25) [i386-mingw32]
Rails version        3.2.17
Environment          production
Database adapter     Mysql2
```

SCM:

```
Subversion           1.8.8
Git                  1.9.0
Filesystem
```

Redmine plugins:

```
extended_fields      0.2.3
redmine_all_files    0.0.3
redmine_codebutton   0.0.1
redmine_screenshot_paste 2.1.0
redmine_tags         2.1.0
sidebar_hide         0.0.7
```

Logs

```
NoMethodError (undefined method `find_custom_field_template' for #<IssuesController:0x3704490>):
  lib/redmine/export/pdf.rb:302:in `block in calc_col_width'
  app/helpers/issues_helper.rb:29:in `block in issue_list'

Any ideas how to fix it?

#2 - 23 Mar 2015 08:29 - Jacek Pasternak

You can find quick-fix here: <http://projects.andriylesyuk.com/issues/2098#note-22> and here <http://projects.andriylesyuk.com/issues/2098#note-24>

After applying this fix PDF export fails with Undefined method 'link_to'.

I've tested it on Redmine 2.5.3. Maybe the next problem is with Redmine 2.5.1. Try attached version.

#5 - 24 Mar 2015 17:05 - Sergey B

The difference was in `extended_issues_controller_patch.rb` and `extended_fields_helper_patch.rb`. After I copied your version, I got the following:

```
NoMethodError (undefined method `link_to' for #<IssuesController:0x36618a8>):  
  lib/redmine/field_format.rb:157:in `block in formatted_value'  
  lib/redmine/field_format.rb:157:in `map'  
  lib/redmine/field_format.rb:157:in `formatted_value'  
  lib/redmine/field_format.rb:146:in `formatted_custom_value'  
  app/helpers/application_helper.rb:187:in `format_object'  
  lib/redmine/export/pdf.rb:302:in `block in calc_col_width'  
  app/helpers/issues_helper.rb:29:in `block in issue_list'  
  app/helpers/issues_helper.rb:25:in `each'  
  app/helpers/issues_helper.rb:25:in `issue_list'  
  lib/redmine/export/pdf.rb:300:in `calc_col_width'  
  lib/redmine/export/pdf.rb:428:in `issues_to_pdf'  
  app/controllers/issues_controller.rb:93:in `block (2 levels) in index'  
  app/controllers/issues_controller.rb:86:in `index'
```

I suppose, in 2.5.3 there must be a method `link_to` in `IssuesController` which is absent in 2.5.1.

#6 - 30 Mar 2015 08:47 - Jacek Pasternak

It's defined in [Redmine root]\lib\redmine\views\other_formats_builder.rb (in 2.5.3 of course). If you don't have it, maybe it's time to upgrade.

[Sergey](#), your patched version contains Polish locale. I wonder, if you would let me to include it into the repository? Is the translation complete and fine to be published?

I think this issue (and similar) should be fixed with [r124](#). Please check and let me know.

#14 - 03 Oct 2016 19:11 - Sergey B

Andrey, the patch is not mine. It's attached by [Jacek Pasternak](#).

#15 - 03 Oct 2016 19:43 - Andriy Lesyuk

[Sergey](#), oh. Right. [Jacek](#), so what about the Polish locale?

#16 - 04 Oct 2016 06:47 - Jacek Pasternak

[Andriy Lesyuk](#) wrote:

I'm using this translations in production environment and Polish is my native language, so ... they are ready to publish (plase do this). It's based on English translatioins (I don't knon Russian), but should be ok.

Btw. is there any chance to make Extedted Fileds plugin working in Redmine 3.0.x? It's causing bugs in issues list.

#17 - 04 Oct 2016 07:02 - Andriy Lesyuk

[Jacek Pasternak](#) wrote:

Working on this right now. It's quite possible, that the latest version in the repository already works fine under Redmine 3.0. Can't guarantee for the moment though...

You can share bugs in the issue list in [#2365](#).

And, thanks for the Polish translation - will use it.

It's not fixed yet. I'm attaching my patch to several bugs found in 0.2.3. Some are fixed in newest release and some not. It's mostly based on my patched version which is attached to this issue. Hope it will be useful.

Are you saying, that you are still getting undefined method `find_custom_field_template'? Or now there are errors related to nil?

#20 - 04 Oct 2016 09:23 - Jacek Pasternak

[Andriy Lesyuk](#) wrote:

No. Just this patch worked for me. Maybe some issues was handled in different way and parts of this patch are not necessary now. I've tested current version just against "double # column" bug. Waiting for fixing this to make other testing.
