Target version:			
Redmine version:		External issue:	

Description
Plugin is not compatible with Redmine 3 (rails 4.2)
I have made a quick patch : https://github.com/harold-s/harold-s/blob/master/patch_openid_fix_for_redmine3

I have cleaned a bit :
You can check this repo which has the two folder (openid_fix 0.20 original and fixed version for Redmine 3), a patch file and a Readme detailing what has changed :
https://github.com/harold-s/harold-s/tree/master/openid_fix

For those who just want a quick fix, download this file :
https://raw.githubusercontent.com/harold-s/harold-s/master/openid_fix/patch_openid_fix_for_redmine3 somewhere. Go in your openid_fix dir (redmine/plugins/openid_fix) and run

```
patch -p1 < /path_to_patch/patch_openid_fix_for_redmine3
```

and you should be good to go !

- Status changed from New to Incomplete

- Assignee set to Harold Simpson

Harold, I wonder, if this change is really needed. I used OpenID Fix to allow Google logins, but, as you probably know, Google has switched to OpenID Connect, what makes this plugin useless at least for me *(I think about dropping it)*.

So, do you really need this change?.. What for? Other OpenID providers?
