WikiNG - Support #2377

Custom macros work, but icon macros do not

Description

I have two identical Redmine 2.5.3 installations on one server, but for two different groups of users with different content.

On both sites the custom wiki macros work fine. On one the icon macros like and work, but these do not work on the other (they just show up as the macro text).

Any idea how to debug what the issue is?

Thanks!
