

## SCM Creator (+Github) - Bug #2385

cannot create Repository anymore (URL should be of Format "file:///var/local/svn/<Repository>")

16 Jun 2015 08:00 - Jonas Götze

<b>Redmine version:</b>			
<b>Description</b>			
Though I am using a correct repository URL like this one <i>file:///var/local/svn/my_repository</i> SCM tells my that <i>URL should be of Format "file:///var/local/svn/&lt;Repository&gt;"</i> I changed the regex in lib/creator/subversion_creator.rb#43 to <code>matches = Regexp.new("^file://#{Regexp.escape(base)}(?:/[^\s]+)?/\$").match(path)</code> (mind the ^ and \$ instead of \A and \z) and it accepts the URL.			
<b>Repository creation still fails</b> with "Redmine based authentication can not be used with this repository name."			
Any clues why? Sadly I am not a Ruby Expert.			
Redmine version 2.6.4.stable.14229 Ruby version 2.0.0-p451 (2014-02-24) [x86_64-linux] Rails version 3.2.21 SCM: Subversion 1.7.10 Redmine plugins: redmine_scm 0.5.1 (latest from SVN)

Regexp and other code fixes

### History

**#1 - 16 Jun 2015 08:23 - Jonas Götze**

Repository creation still fails with "Redmine based authentication can not be used with this repository name."

Fixed that one. Was not aware that the project name and repository name should match.
