| <b>Description</b>   |            |                        |             |
| Hi andriy,   |            |                        |             |
| There are two lacks in redmine wiki numbering (in Textile) for me.   |            |                        |             |
| 1. Always show only last index.  |            |                        |             |
| 1. for example, there is only one number (1.) begin of this line. I need two numbers, like as 1.1. without additional insert (space) |            |                        |             |
| 2. Headers does not support numbering.   |            |                        |             |
| I created a feature request in redmine about this case => <a href="#">#20595</a>   |            |                        |             |
| And I found a board topic => <a href="http://www.redmine.org/boards/2/topics/42215">http://www.redmine.org/boards/2/topics/42215</a> |            |                        |             |
| I suppose that you may find this case as interesting for WikiNG  |            |                        |             |

History

#1 - 03 Sep 2015 21:37 - Adnan Topçu

this plugin helped me to solve this issue.  
I have created a CCS script as custom macro and I included it top of wiki content.  
I'll share it.

Thanks a lot!
