Description

I can find, in the documentation, how to make a link to the english wikipedia topics. I can not see how to link to an spanish (or chinese, or french... wikipedia topics). Is it possible?

On the other hand, I found this solved issue #2142, which mentions "wikipedia language", so maybe it is an already implemented (but not documented) feature?

Thanks for your work, you are great!

Hi, I have figured how to do it:

[Método en V](#)

```
[[wikipedia>es:Método_en_V|Método en V]]
```

So, I think this issue is only an information lack one.

Best regards.

Yes, this feature was already implemented. And, no – the correct syntax is:

```
[[wikipedia[es]>Método_en_V]]
```
