Description	
There are some data in the database - especially in image (CDP) and video (CDV/CDVA) databases - that might need to be modified manually. These data include:	
<ul style="list-style-type: none">• IMDB movie identifier. This one is not currently set and is aimed to be set manually only.• The quality of translation (of audio stream in video). This one currently can be set only to ORIGINAL (no translation) or DUBBED. Other its values, such as TWO-VOICE and SINGLE-VOICE, can be set only manually.• Thumbnails. CD-Index may accidentally take a black screen as a thumbnail. There should be a way to regenerate such thumbnails, without rerunning cdindex (what does not guarantee, that all thumbnails will be good).	
For the above cases a new tool, e.g., cdmodify, could be used (for example):	
<ul style="list-style-type: none">• cdmodify "Test media" "path/to/file.ext" imdb 123456• cdmodify "Test media" "path/to/file.ext" audio[1].translation 1-VOICE• cdmodify "Test media" "path/to/file.ext" thumbnail[1]
