Description <p>Orangutan asks if he should record a break when the user changes his status to online after being away for more than 5 minutes. It would be nice to let the user specify the time of a break, after which Orangutan will not ask him to record one (for me the best is around 20 minutes).</p> <p>Fore example:</p> <p>you: Do not ask me to record breaks if I am away for less than 20 minutes!</p> <p>orangutan: Okay</p>
