<b>Description</b> Orangutan could support TODO lists. That is it could allow user to say something like: "TODO: fix bug #5645" and Orangutan could save it to user's TODO list. Items to TODO list could be added by managers as well (of course, user will need to specify who is allowed to). Items can have different priorities. In any time user should be able to see his TODO. It would be good if he could also "Let's work on #6" and Orangutan would start a task with corresponding name. This bug should be in low priority as far as it is not required for work. Just an idea.
