**Description**

Redmine supports custom fields which contain of: a) name, b) value. Orangutan can be able to modify them. The request can be:

```
User: Set "Contact" of #562 to "Andriy Lesyuk"
Orangutan: Ok...
```

Of course, Orangutan should support values ranges, formats etc...

In addition in the same context or in another context native issue properties can be supported (because the syntax is very similar):

```
User: Set Priority of #562 to "Low"
Orangutan: Ok...
```
