

## Orangutan - Feature #941

### Support Google calendar

01 Oct 2010 12:47 - Andriy Lesyuk

<b>Status:</b> Open	<b>Start date:</b>
<b>Priority:</b> Minor	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b>	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Description</b> <p>Orangutan can notify users about Google events (when they are added, in a hour before event etc).</p> <p>For this there should be developed a special "monkey" - separate system process (maybe there are such programmes already or programmes which can be used?) which will notify Orangutan about events.</p> <p>In addition a special context can ask users whether they are going to attend an event:</p> <pre>Orangutan: User user@host.com added an event "Company meeting" on Thu 15:00 - 16:00. Orangutan: Are you going? User: Maybe Orangutan: Understood.</pre> <p>Also a mapping should be used to determine which user "owns" a Google email account used in calendar...</p>
