Description				
Searching for issues with the new issue ID does not work.				

History

#1 - 19 Jul 2018 08:40 - daniel wieselwind

Just to clarify, for example with issue ISSUE-5678 and legacy ID 1234, searching for "5678" or "ISSUE-5678" comes up empty.
Also, when looking for ISSUE-1234, a search for "1234" will redirect to, for example ISSUE-576 (whose legacy id is 1234).

I cannot link is as duplicate of ISSUE-15 here.

#2 - 20 Jul 2018 11:21 - Andriy Lesyuk

- Status changed from New to Open

- Assignee set to Andriy Lesyuk

- Target version set to 0.0.3

Thanks for reporting the issue.

Thank you for your plug-in. It's really cool.
I feel like a little bit inconvinient with this bug.
so, I fixed this issue like following.
I'm using redmine 3.4.6 now. I hope this fix will include version 0.3 soon.
Have a nice day~!

redmine/app/models/issue.rb

```
line 44~46:
-acts_as_searchable :columns => ['subject', "#{table_name}.description"],
-                      :preload => [:project, :status, :tracker],
-                      :scope => lambda {|options| options[:open_issues] ? self.open : self.all}
+
  acts_as_searchable :columns => ['subject', "#{table_name}.description", 'concat(project_key, '-', issue_numb
er)'],
+                      :preload => [:project, :status, :tracker],
+                      :scope => lambda {|options| options[:open_issues] ? self.open : self.all}
```
