Redmine waits for the parent id, not an alias created by Issue-id plugin. So you have to change alias for parent Id. You can now save issue.

make Redmine work with such IDs will be great.

#2 - 06 Feb 2015 18:41 - Mateusz Zajacka

How exactly can you change the alias for parent id? if I enable issue-id on my project (assign project identifier) then all issues are identified only by project-specific ID, I don't see any way to reference them by any other means.

Any suggestion will be appreciated, other than that issue-id is wonderful work and great plugin!

UPDATE: I can locate the original numeric ID by using context menu on an issue and checking the URL (which contains object id), then using this original ID in the "Parent Task" field and it does help - but this is very cumbersome...

#3 - 28 Aug 2016 17:10 - Andriy Lesyuk

- Subject changed from can not save a subtask to Can not save a subtask

- Status changed from New to Open

- Target version set to 0.0.2

#4 - 20 Oct 2016 08:23 - Andriy Lesyuk

- Priority changed from Normal to Major

#5 - 06 Nov 2016 11:48 - Mikhail Voronyuk

Fixed in this fork: https://github.com/VoronyukM/issue_id

#6 - 10 Nov 2016 14:52 - Andriy Lesyuk

- *Status changed from Open to Closed*

- *% Done changed from 0 to 100*

Applied in changeset [r25](#).
